

Our Belief Statements

We Believe...

In being Christ-centred in all that we do, ensuring that Catholic values and teachings are woven through every dimension of the students' learning experience, giving particular focus to social justice and living a faith-filled life.

In the constant striving for excellence in everything we do through continuous improvement strategies and being progressive and future-oriented in our planning and change management approaches.

Each child is a gift from God and has the potential to grow, to develop and to contribute. Each person is worthy of our respect, is to be included and is to be treated fairly and with dignity.

Our staff and volunteers are our most important resource. It is through their commitment and dedication that Catholic students can deepen the practice of their faith and realize their individual potential.

In the importance of collaborative strategies and partnerships that have the capacity to bring all the community's resources together to support the learning and development of each student.

In being accountable to our stakeholders for the resources that we use, the decisions that we make and the outcomes that we achieve.

Catholic Culture of Deep Caring

The Catholic faith is not only part of our curriculum within Catholic schools. It is a way of life and being which we strive to make real and tangible, in every aspect of our shared life. Several years ago, in consultation with our parent community, deanery, staff and students, we identified ten key virtues reflecting the qualities of character which we desire to see alive in all persons who comprise our Catholic educational communities. Although all of these virtues, and others as well, are integral to our life throughout the year, we have chosen to focus on, and practice in a particular way, one virtue each month.
